

# Evolon Edge

## Camera Plugin

### PRODUCT DETAILS

- 📍 Cover more area with fewer cameras
- 📏 Detect motion-based threats at up to 3 miles
- 🎯 Track threats with autonomous PTZ control
- 🔗 Integrated with Evolon Insites for advanced analytics

Get five free camera subscriptions for your office

## Time Tested Features

Evolon Edge combines over a decade's work in video analytics, ultra-long-range threat detection, and camera development. When you add Edge to your existing Axis and Hanwha cameras, you unlock features built for security pros.

Removes noise from the environment and insects

Eliminates noise caused by light and glare

Enhanced detection in extreme low-light

Dynamic scene masking to focus surveillance

Dwell detection catches loitering activity

Angular scaling adds a flexible focal target

### Ultra long-range threat detection

Evolon Edge will extend your camera's motion detection capabilities. With only 4 pixels on target required to identify objects - threats are hard to miss.

The scene shown here is shot over two miles with one fixed and one PTZ camera.

### Make data-driven decisions to improve perimeter security

Fully integrated with Evolon Insites for a camera-to-cloud perimeter security solution. Know which cameras/sites are most active, what hours of day security events take place, and anomalies that require immediate attention.

### We're constantly improving

We are rapidly developing perimeter security solutions powered by AI and video analytics. You'll consistently unlock new features, improved AI models, and more.
