

# Evolon Enterprise

## AI Appliance

### PRODUCT DETAILS

-  Turn any IP security camera into a smart camera
-  Reduce false alarms with AI object classification
-  Push alarms into your VMS for rapid response
-  Five years of Evolon software maintenance and Dell-provided on-site hardware support

## Features built for security pros

For over a decade, Evolon has deployed video analytics and AI within air-gapped and high-security sites. Evolon Enterprise brings the best of edge video analytics and perimeter security AI into a small appliance form factor for on-premise deployment - within your private network.

 AI object classification and intelligence

 Eliminates noise caused by light and glare

 Enhanced detection in extreme low-light

 Hardware and camera health monitoring

 Air-gapped AI with no internet required

 Access to onboarding, training, and support

### Highly accurate threat detection purpose-built for critical infrastructure

Turn your cameras into AI sentries  
Never tired, distracted, or untrained  
Monitoring - 24/7

### Significant impact with small size

Evolon Enterprise deploys quickly.  
Connects to your cameras, NVRs, VMS, and more  
Provides real-time threat detection and intelligence.

### We're constantly improving

We are rapidly developing perimeter security solutions powered by AI and video analytics. You'll consistently unlock new features, improved AI models, and more.
